

EDUCATION

- **Université de Montréal**
M.Sc. in Computer Science
Montréal, Canada
- **Sharif University of Technology**
B.Sc. in Computer Science
Tehran, Iran

SKILLS

- **Programming**
 - Python ◦ Scala ◦ C++
- **ML Tools**
 - PyTorch ◦ Tensorflow ◦ NumPy
 - JAX
- **Data Technologies**
 - Apache Spark ◦ PySpark
 - Apache Hadoop, Airflow, Kafka
- **Misc**
 - Docker ◦ Singularity
 - Bash ◦ Slurm ◦ L^AT_EX

HONORS AND AWARDS

- **Bourse D'excellence DIRO**
Université de Montréal
Montréal, Canada | 2022
- **M.Sc. Tuition Exemption Scholarships (Bourse C)**
Université de Montréal
Montréal, Canada | 2021
- **International Undergraduate Excellence Award**
Chair for CAMPAR of TUM
Munich, Germany | 2019
- **Silver Medal**
24th Iranian National Olympiad
in Informatics(INOI)
Tehran, Iran | 2014

VOLUNTEERING SERVICES

- **Reviewer**
 - ICML22 ◦ Neurips22 ◦ ICML23
- **Part of Scientific Committee**
Iranian National Olympiad
in Informatics

HIGHLIGHTS

- 6+ years of combined industrial and academic experience applying AI/ML techniques to tackle both fundamental research challenges and real-world problems.
- 4+ years of industrial experience in managing and optimizing large-scale data pipelines.

SELECTED EXPERIENCES

- **Mila - Quebec AI Institute** | *M.Sc. Student*
Montréal, Canada | Jan 2021 – Present
 - Focused on fundamental questions at the intersection of model-based reinforcement learning (MBRL) and continual learning.
 - Published in tier 1 artificial intelligence conference.
 - Highlighting the importance of local adaptivity in MBRL, identifying design choices in popular methods that hinder it, and proposing locally adaptive MBRL methods.
 - Contributed as a core developer to an open-source research framework for RL, **RLHive** (code, docs), featuring a collection of popular single-agent and multi-agent algorithms implemented in PyTorch.
- **iCAD Dental** | *ML Research Developer (part-time)*
Ottawa, Canada | Jan. 2022 – May. 2022
 - Designed a pipeline for the classification and clustering of dental objects, specifically crowns, utilizing a database of SSM files as the primary source of data.
- **CafeBazaar Inc.** | *Data Scientist*
Tehran, Iran | Sep. 2017 – Jan. 2021
 - CafeBazaar is Iran's third-party android marketplace with more than 40 million users.
 - Personalization Team:
 - * Developed and implemented the app recommender system model trainer using the Implicit-als algorithm and tuned the essential hyperparameters.
 - * Conducted A/B testing to validate improvements and devised a solution to diversify recommended app categories.
 - * Increased the recommendation list's install rate from 1.6% to 2.5%.
 - Search-ads Team:
 - * As a core founding member, led the data science, mechanism design, and optimization efforts of a team of two data scientists and one intern.
 - * Designed the auction mechanism and systems for setting the reserved price, profiling users, and suggesting relevant query keywords to developers. (Towards Data Science post)
 - * Through these efforts, the Search-ads team became one of the company's top three daily revenue generators.
- **Chair for CAMPAR** | *Undergraduate Research Assistant*
Munich, Germany | Jul. 2019 – Oct. 2019
 - Contributed to a project focused on 3D camera re-localization in dynamic indoor environments. Coded a valid pose generator, utilizing rendered scenes, for the 3RScan data.
