

- 6+ years of industrial and academic experience applying AI/ML techniques to fundamental research and real-world problems.
- 4+ years of industrial experience in managing and optimizing large-scale data pipelines.

Education

- **University of Montreal - Mila** Montreal, Canada
M.Sc. in Computer Science
- **Sharif University of Technology** Tehran, Iran
B.Sc. in Computer Science

Experience

- **Mila - Quebec AI Institute** — *Research Assistant* Montreal, Canada — Jan 2021 – Present
 - Focused on model-based reinforcement learning (MBRL) and continual learning. Published in tier 1 artificial intelligence conference.
 - Highlighting the importance of local adaptivity, identifying design choices that hinder it, and proposing adaptive MBRL methods.
 - Core developer of an open-source research framework for single/multi-agent RL algorithms. **RLHive** ([code](#), [docs](#))
- **iCAD Dental** — *ML Research Developer (part-time)* Ottawa, Canada — Jan. 2022 – May. 2022
 - Designed a python pipeline from scratch for the classification and clustering of dental objects and crowns.
- **CafeBazaar Inc.** — *Data Scientist* Tehran, Iran — Sep. 2017 – Jan. 2021
 - CafeBazaar is Iran's third-party android marketplace with **more than 40 million users**.
 - Personalization Team:
 - * Developed and implemented the app recommender system model.
 - * Conducted A/B testing to validate improvements and devised a solution to diversify recommended app categories.
 - * Increased the recommendation list's **install rate from 1.6% to 2.5%**.
 - Search-ads Team:
 - * As a core founding member, led the data science, mechanism design, and optimization efforts of the team.
 - * Designed the auction mechanism and systems for setting the reserved price, and profiling users. ([Technical Report](#))
 - * Through these efforts, the Search-ads team became one of the company's top three daily revenue generators.
 - Search Team:
 - * Worked on the app ranking system and other NLP services such as the spell-checker and query suggestion.
 - * Reduced the overall search **bounce rate from 41% to 35%**.
- **Chair for CAMPAR** — *Research Assistant* Munich, Germany — Jul. 2019 – Oct. 2019
 - Worked on 3D camera re-localization in dynamic environments. Developed a pose generator using rendered scenes for 3RScan data.

Publications

* DENOTES EQUAL CONTRIBUTION.

- **Replay Buffer with Local Forgetting for Adaptive Deep Model-Based Reinforcement Learning.**
Conference on Lifelong Learning Agents, **CoLLAs 2023** (*Oral*) ([paper](#))
and **NeurIPS 2022** - Deep Reinforcement Learning Workshop
Rahimi-Kalahroudi, A., Rajendran, J., Momennejad, I., Van Seijen, H., Chandar, S.
- **Towards Evaluating Adaptivity of Model-Based Reinforcement Learning Methods.**
International Conference on Machine Learning, **ICML 2022** ([paper](#), [code](#))
Wan, Y.*, **Rahimi-Kalahroudi, A.***, Rajendran, J., Momennejad, I., Chandar, S., Van Seijen, H.

Honors and Awards

- Awarded Exceptional Grade for the M.Sc. Thesis (Top 1%) - University of Montreal Montreal, Canada — 2023
- Bourse D'excellence DIRO - University of Montreal Montreal, Canada — 2022
- M.Sc. Tuition Exemption Scholarships (Bourse C) - University of Montreal Montreal, Canada — 2021
- **International Undergraduate Excellence Award** - **Technical University of Munich** Munich, Germany — 2019
- **Silver Medal** - 24th Iranian National Olympiad in Informatics (**INOI**) Tehran, Iran — 2014

Skills

- **Programming:** Python, Scala, and C++.
- **Data Technologies:** Apache Spark, Hadoop, Airflow, and Kafka.
- **ML Tools:** PyTorch, Tensorflow, NumPy, and JAX.
- **Misc:** Docker, Singularity, Bash, Slurm, and L^AT_EX
